

C03 Downloadable Professional Resource Pack

Phenomenon-Based, Project-Based and Interdisciplinary Learning

Finnish-inspired - EDUFI-aligned - FINEEC-benchmarked

Digital professional learning platform

Email: hello@fcei.eu | Website: www.fcei.eu

Course resource purpose

This course-level downloadable pack upgrades the FCEI resources for Phenomenon-Based, Project-Based and Interdisciplinary Learning. It is designed for learner use, facilitator guidance, institutional implementation and developer integration on www.fcei.eu.

Framework focus: phenomenon-based learning. Core terminology: interdisciplinary inquiry, project work, collaboration and transversal competence.

Professional framing used in every resource

OKM / Ministry of Education and Culture: system development, public responsibility, education quality, institutional direction and policy-aware improvement.

EDUFI: curriculum as a common foundation for equality, local adaptation, school culture, pedagogy, teaching support and learner experience.

FINEEC: enhancement-led evaluation, participation, trust, learning, appreciation, strengths, development targets and impact.

Module downloadables

C03-M01 - Phenomenon-Based Learning Foundations

Downloadable resource	Phenomenon-Based Learning Foundations - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Phenomenon-Based Learning Foundations within Phenomenon-Based, Project-Based and Interdisciplinary Learning. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Phenomenon-Based Learning Foundations, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	project inquiry map, collaborative role plan and learner product evidence
Model completed example	A participant notices that phenomenon-based learning foundations is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.

Reflection prompt	What changed in practice after using this Phenomenon-Based Learning Foundations resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Phenomenon-Based Learning Foundations - Professional Downloadable Toolkit, includes evidence connected to project inquiry map, collaborative role plan and learner product evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C03-M02 - Project Question and Inquiry Design

Downloadable resource	Project Question and Inquiry Design - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Project Question and Inquiry Design within Phenomenon-Based, Project-Based and Interdisciplinary Learning. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Project Question and Inquiry Design, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	project inquiry map, collaborative role plan and learner product evidence
Model completed example	A participant notices that project question and inquiry design is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Project Question and Inquiry Design resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Project Question and Inquiry Design - Professional Downloadable Toolkit, includes evidence connected to project inquiry map, collaborative role plan and learner product evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C03-M03 - Interdisciplinary Planning Map

Downloadable resource	Interdisciplinary Planning Map - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Interdisciplinary Planning Map within Phenomenon-Based, Project-Based and Interdisciplinary Learning. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.

EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Interdisciplinary Planning Map, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	project inquiry map, collaborative role plan and learner product evidence
Model completed example	A participant notices that interdisciplinary planning map is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Interdisciplinary Planning Map resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Interdisciplinary Planning Map - Professional Downloadable Toolkit, includes evidence connected to project inquiry map, collaborative role plan and learner product evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C03-M04 - Collaborative Project Roles

Downloadable resource	Collaborative Project Roles - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Collaborative Project Roles within Phenomenon-Based, Project-Based and Interdisciplinary Learning. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Collaborative Project Roles, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	project inquiry map, collaborative role plan and learner product evidence
Model completed example	A participant notices that collaborative project roles is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Collaborative Project Roles resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Collaborative Project Roles - Professional Downloadable Toolkit, includes evidence connected to project inquiry map, collaborative role plan and learner product evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source

- Stakeholder or learner voice
- Reflection and next improvement decision

C03-M05 - Presentation, Reflection and Transfer

Downloadable resource	Presentation, Reflection and Transfer - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Presentation, Reflection and Transfer within Phenomenon-Based, Project-Based and Interdisciplinary Learning. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Presentation, Reflection and Transfer, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	project inquiry map, collaborative role plan and learner product evidence
Model completed example	A participant notices that presentation, reflection and transfer is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Presentation, Reflection and Transfer resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Presentation, Reflection and Transfer - Professional Downloadable Toolkit, includes evidence connected to project inquiry map, collaborative role plan and learner product evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C03-M06 - Project Evidence Portfolio

Downloadable resource	Project Evidence Portfolio - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Project Evidence Portfolio within Phenomenon-Based, Project-Based and Interdisciplinary Learning. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Project Evidence Portfolio, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	project inquiry map, collaborative role plan and learner product evidence
Model completed example	A participant notices that project evidence portfolio is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Project Evidence Portfolio resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

Research-informed source basis

- OKM - Ministry of Education and Culture: <https://okm.fi/en/duties-and-objectives> - Education development as policy, public responsibility, system direction and institutional development context.
- EDUFI - National Core Curriculum: <https://www.oph.fi/en/education-and-qualifications/national-core-curriculum-primary-and-lower-secondary-basic-education> - National core curriculum as common foundation for local curricula, equality, local adaptation and teaching support.
- EDUFI - Basic Education: <https://www.oph.fi/en/education-system/basic-education> - Curriculum supporting reform of school culture and pedagogy to improve learning process and outcomes.
- FINEEC - Enhancement-led evaluation: <https://www.karvi.fi/en/about-us/about-our-evaluations/enhancement-led-evaluation> - Development, participation, learning, positive approach, appreciation, trust and impact.
