

C04 Downloadable Professional Resource Pack

Inclusive Education, Equity and Structured Support

Finnish-inspired - EDUFI-aligned - FINEEC-benchmarked

Digital professional learning platform

Email: hello@fcei.eu | Website: www.fcei.eu

Course resource purpose

This course-level downloadable pack upgrades the FCEI resources for Inclusive Education, Equity and Structured Support. It is designed for learner use, facilitator guidance, institutional implementation and developer integration on www.fcei.eu.

Framework focus: inclusive support. Core terminology: access, early support, differentiation and fair participation.

Professional framing used in every resource

OKM / Ministry of Education and Culture: system development, public responsibility, education quality, institutional direction and policy-aware improvement.

EDUFI: curriculum as a common foundation for equality, local adaptation, school culture, pedagogy, teaching support and learner experience.

FINEEC: enhancement-led evaluation, participation, trust, learning, appreciation, strengths, development targets and impact.

Module downloadables

C04-M01 - Equity and Access Mapping

Downloadable resource	Equity and Access Mapping - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Equity and Access Mapping within Inclusive Education, Equity and Structured Support. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Equity and Access Mapping, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	access map, support plan, learner work sample and inclusion review
Model completed example	A participant notices that equity and access mapping is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Equity and Access Mapping resource? What evidence supports your judgement? What should be continued, adapted,

Certificate evidence rule	scaled or redesigned? The downloadable evidence is complete when the participant submits a filled Equity and Access Mapping - Professional Downloadable Toolkit, includes evidence connected to access map, support plan, learner work sample and inclusion review, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.
---------------------------	--

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C04-M02 - Structured Support Planning

Downloadable resource	Structured Support Planning - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Structured Support Planning within Inclusive Education, Equity and Structured Support. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Structured Support Planning, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	access map, support plan, learner work sample and inclusion review
Model completed example	A participant notices that structured support planning is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Structured Support Planning resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Structured Support Planning - Professional Downloadable Toolkit, includes evidence connected to access map, support plan, learner work sample and inclusion review, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C04-M03 - Inclusive Classroom Routines

Downloadable resource	Inclusive Classroom Routines - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Inclusive Classroom Routines within Inclusive Education, Equity and Structured Support. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local

	adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Inclusive Classroom Routines, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	access map, support plan, learner work sample and inclusion review
Model completed example	A participant notices that inclusive classroom routines is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Inclusive Classroom Routines resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Inclusive Classroom Routines - Professional Downloadable Toolkit, includes evidence connected to access map, support plan, learner work sample and inclusion review, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C04-M04 - Early Identification and Response

Downloadable resource	Early Identification and Response - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Early Identification and Response within Inclusive Education, Equity and Structured Support. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Early Identification and Response, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	access map, support plan, learner work sample and inclusion review
Model completed example	A participant notices that early identification and response is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Early Identification and Response resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Early Identification and Response - Professional Downloadable Toolkit, includes evidence connected to access map, support plan, learner work sample and inclusion review, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C04-M05 - Collaboration with Families and Teams

Downloadable resource	Collaboration with Families and Teams - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Collaboration with Families and Teams within Inclusive Education, Equity and Structured Support. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Collaboration with Families and Teams, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	access map, support plan, learner work sample and inclusion review
Model completed example	A participant notices that collaboration with families and teams is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Collaboration with Families and Teams resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Collaboration with Families and Teams - Professional Downloadable Toolkit, includes evidence connected to access map, support plan, learner work sample and inclusion review, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C04-M06 - Inclusive Evidence Portfolio

Downloadable resource	Inclusive Evidence Portfolio - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Inclusive Evidence Portfolio within Inclusive Education, Equity and Structured Support. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Inclusive Evidence Portfolio, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	access map, support plan, learner work sample and inclusion review
Model completed example	A participant notices that inclusive evidence portfolio is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Inclusive Evidence Portfolio resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Inclusive Evidence Portfolio - Professional Downloadable Toolkit, includes evidence connected to access map, support plan, learner work sample and inclusion review, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
