

C05 Downloadable Professional Resource Pack

Assessment for Learning and Evidence Portfolios

Finnish-inspired - EDUFI-aligned - FINEEC-benchmarked

Digital professional learning platform

Email: hello@fcej.eu | Website: www.fcej.eu

Course resource purpose

This course-level downloadable pack upgrades the FCEI resources for Assessment for Learning and Evidence Portfolios. It is designed for learner use, facilitator guidance, institutional implementation and developer integration on www.fcej.eu.

Framework focus: assessment for learning. Core terminology: formative feedback, self-assessment, portfolios and evidence of progress.

Professional framing used in every resource

OKM / Ministry of Education and Culture: system development, public responsibility, education quality, institutional direction and policy-aware improvement.

EDUFI: curriculum as a common foundation for equality, local adaptation, school culture, pedagogy, teaching support and learner experience.

FINEEC: enhancement-led evaluation, participation, trust, learning, appreciation, strengths, development targets and impact.

Module downloadables

C05-M01 - Assessment for Learning Foundations

Downloadable resource	Assessment for Learning Foundations - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Assessment for Learning Foundations within Assessment for Learning and Evidence Portfolios. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Assessment for Learning Foundations, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	feedback sample, rubric, self-assessment record and portfolio evidence
Model completed example	A participant notices that assessment for learning foundations is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Assessment for Learning Foundations resource? What evidence supports your judgement? What should be continued,

Certificate evidence rule	adapted, scaled or redesigned? The downloadable evidence is complete when the participant submits a filled Assessment for Learning Foundations - Professional Downloadable Toolkit, includes evidence connected to feedback sample, rubric, self-assessment record and portfolio evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.
---------------------------	---

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C05-M02 - Feedback That Moves Learning Forward

Downloadable resource	Feedback That Moves Learning Forward - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Feedback That Moves Learning Forward within Assessment for Learning and Evidence Portfolios. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Feedback That Moves Learning Forward, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	feedback sample, rubric, self-assessment record and portfolio evidence
Model completed example	A participant notices that feedback that moves learning forward is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Feedback That Moves Learning Forward resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Feedback That Moves Learning Forward - Professional Downloadable Toolkit, includes evidence connected to feedback sample, rubric, self-assessment record and portfolio evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C05-M03 - Self-Assessment and Peer Review

Downloadable resource	Self-Assessment and Peer Review - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Self-Assessment and Peer Review within Assessment for Learning and Evidence Portfolios. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local

	adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Self-Assessment and Peer Review, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	feedback sample, rubric, self-assessment record and portfolio evidence
Model completed example	A participant notices that self-assessment and peer review is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Self-Assessment and Peer Review resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Self-Assessment and Peer Review - Professional Downloadable Toolkit, includes evidence connected to feedback sample, rubric, self-assessment record and portfolio evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C05-M04 - Rubrics and Success Criteria

Downloadable resource	Rubrics and Success Criteria - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Rubrics and Success Criteria within Assessment for Learning and Evidence Portfolios. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Rubrics and Success Criteria, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	feedback sample, rubric, self-assessment record and portfolio evidence
Model completed example	A participant notices that rubrics and success criteria is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Rubrics and Success Criteria resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Rubrics and Success Criteria - Professional Downloadable Toolkit, includes evidence connected to feedback sample, rubric, self-assessment record and portfolio evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C05-M05 - Evidence Portfolio Design

Downloadable resource	Evidence Portfolio Design - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Evidence Portfolio Design within Assessment for Learning and Evidence Portfolios. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Evidence Portfolio Design, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	feedback sample, rubric, self-assessment record and portfolio evidence
Model completed example	A participant notices that evidence portfolio design is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Evidence Portfolio Design resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Evidence Portfolio Design - Professional Downloadable Toolkit, includes evidence connected to feedback sample, rubric, self-assessment record and portfolio evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C05-M06 - Assessment Review and Improvement

Downloadable resource	Assessment Review and Improvement - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Assessment Review and Improvement within Assessment for Learning and Evidence Portfolios. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation.
