

C07 Downloadable Professional Resource Pack

Classroom Wellbeing, Joy of Learning and Safe Participation

Finnish-inspired - EDUFI-aligned - FINEEC-benchmarked

Digital professional learning platform

Email: hello@fcei.eu | Website: www.fcei.eu

Course resource purpose

This course-level downloadable pack upgrades the FCEI resources for Classroom Wellbeing, Joy of Learning and Safe Participation. It is designed for learner use, facilitator guidance, institutional implementation and developer integration on www.fcei.eu.

Framework focus: wellbeing and joy. Core terminology: safe participation, belonging, motivation and learning climate.

Professional framing used in every resource

OKM / Ministry of Education and Culture: system development, public responsibility, education quality, institutional direction and policy-aware improvement.

EDUFI: curriculum as a common foundation for equality, local adaptation, school culture, pedagogy, teaching support and learner experience.

FINEEC: enhancement-led evaluation, participation, trust, learning, appreciation, strengths, development targets and impact.

Module downloadables

C07-M01 - Wellbeing as a Condition for Learning

Downloadable resource	Wellbeing as a Condition for Learning - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Wellbeing as a Condition for Learning within Classroom Wellbeing, Joy of Learning and Safe Participation. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Wellbeing as a Condition for Learning, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	wellbeing check-in, participation evidence and learning climate review
Model completed example	A participant notices that wellbeing as a condition for learning is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Wellbeing as a Condition for Learning resource? What evidence supports your judgement? What should be continued,

	adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Wellbeing as a Condition for Learning - Professional Downloadable Toolkit, includes evidence connected to wellbeing check-in, participation evidence and learning climate review, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C07-M02 - Safe Participation Routines

Downloadable resource	Safe Participation Routines - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Safe Participation Routines within Classroom Wellbeing, Joy of Learning and Safe Participation. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Safe Participation Routines, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	wellbeing check-in, participation evidence and learning climate review
Model completed example	A participant notices that safe participation routines is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Safe Participation Routines resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Safe Participation Routines - Professional Downloadable Toolkit, includes evidence connected to wellbeing check-in, participation evidence and learning climate review, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C07-M03 - Joy, Motivation and Meaningful Challenge

Downloadable resource	Joy, Motivation and Meaningful Challenge - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Joy, Motivation and Meaningful Challenge within Classroom Wellbeing, Joy of Learning and Safe Participation. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local

	adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Joy, Motivation and Meaningful Challenge, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
