

# C08 Downloadable Professional Resource Pack

Play, Creativity and Early Years Finnish Practice

Finnish-inspired - EDUFI-aligned - FINEEC-benchmarked

Digital professional learning platform

Email: [hello@fcei.eu](mailto:hello@fcei.eu) | Website: [www.fcei.eu](http://www.fcei.eu)

## Course resource purpose

This course-level downloadable pack upgrades the FCEI resources for Play, Creativity and Early Years Finnish Practice. It is designed for learner use, facilitator guidance, institutional implementation and developer integration on [www.fcei.eu](http://www.fcei.eu).

Framework focus: early years and play. Core terminology: play-based pedagogy, observation, creativity and family partnership.

## Professional framing used in every resource

OKM / Ministry of Education and Culture: system development, public responsibility, education quality, institutional direction and policy-aware improvement.

EDUFI: curriculum as a common foundation for equality, local adaptation, school culture, pedagogy, teaching support and learner experience.

FINEEC: enhancement-led evaluation, participation, trust, learning, appreciation, strengths, development targets and impact.

## Module downloadables

### C08-M01 - Play as Pedagogy

|                                   |                                                                                                                                                                                                                                                                                           |
|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Downloadable resource</b>      | Play as Pedagogy - Professional Downloadable Toolkit                                                                                                                                                                                                                                      |
| <b>Short explanation</b>          | This downloadable toolkit supports Play as Pedagogy within Play, Creativity and Early Years Finnish Practice. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.                                 |
| <b>OKM framing</b>                | The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility. |
| <b>EDUFI-aligned framing</b>      | The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.    |
| <b>FINEEC-benchmarked framing</b> | The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.                                            |
| <b>Meaning in practice</b>        | In practice, participants use the toolkit to identify one priority related to Play as Pedagogy, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.                                                                     |
| <b>Evidence requirement</b>       | play observation record, child voice note and activity plan evidence                                                                                                                                                                                                                      |
| <b>Model completed example</b>    | A participant notices that play as pedagogy is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.      |
| <b>Reflection prompt</b>          | What changed in practice after using this Play as Pedagogy resource? What evidence supports your judgement? What should be continued, adapted, scaled or                                                                                                                                  |

|                           |                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Certificate evidence rule | redesigned?<br>The downloadable evidence is complete when the participant submits a filled Play as Pedagogy - Professional Downloadable Toolkit, includes evidence connected to play observation record, child voice note and activity plan evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework. |

| <b>Downloadable resource</b>      | Child Voice and Participation - Professional Downloadable Toolkit                                                                                                                                                                                                                                                                                           |
| <b>Short explanation</b>          | This downloadable toolkit supports Child Voice and Participation within Play, Creativity and Early Years Finnish Practice. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.                                                                                      |
| <b>OKM framing</b>                | The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.                                                                   |
| <b>EDUFI-aligned framing</b>      | The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.                                                                      |
| <b>FINEEC-benchmarked framing</b> | The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.                                                                                                              |
| <b>Meaning in practice</b>        | In practice, participants use the toolkit to identify one priority related to Child Voice and Participation, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.                                                                                                                          |
| <b>Evidence requirement</b>       | play observation record, child voice note and activity plan evidence                                                                                                                                                                                                                                                                                        |
| <b>Model completed example</b>    | A participant notices that child voice and participation is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.                                                           |
| <b>Reflection prompt</b>          | What changed in practice after using this Child Voice and Participation resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?                                                                                                                                                                           |
| <b>Certificate evidence rule</b>  | The downloadable evidence is complete when the participant submits a filled Child Voice and Participation - Professional Downloadable Toolkit, includes evidence connected to play observation record, child voice note and activity plan evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework. |
