

C09 Downloadable Professional Resource Pack

Curriculum Design, Local Adaptation and Learning Pathways

Finnish-inspired - EDUFI-aligned - FINEEC-benchmarked

Digital professional learning platform

Email: hello@fcej.eu | Website: www.fcej.eu

Course resource purpose

This course-level downloadable pack upgrades the FCEI resources for Curriculum Design, Local Adaptation and Learning Pathways. It is designed for learner use, facilitator guidance, institutional implementation and developer integration on www.fcej.eu.

Framework focus: curriculum design. Core terminology: local curriculum adaptation, pathways, outcomes and evidence review.

Professional framing used in every resource

OKM / Ministry of Education and Culture: system development, public responsibility, education quality, institutional direction and policy-aware improvement.

EDUFI: curriculum as a common foundation for equality, local adaptation, school culture, pedagogy, teaching support and learner experience.

FINEEC: enhancement-led evaluation, participation, trust, learning, appreciation, strengths, development targets and impact.

Module downloadables

C09-M01 - Curriculum Intent and Local Needs

Downloadable resource	Curriculum Intent and Local Needs - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Curriculum Intent and Local Needs within Curriculum Design, Local Adaptation and Learning Pathways. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Curriculum Intent and Local Needs, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	curriculum map, local adaptation rationale and pathway evidence
Model completed example	A participant notices that curriculum intent and local needs is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Curriculum Intent and Local Needs resource? What evidence supports your judgement? What should be continued,

Certificate evidence rule	adapted, scaled or redesigned? The downloadable evidence is complete when the participant submits a filled Curriculum Intent and Local Needs - Professional Downloadable Toolkit, includes evidence connected to curriculum map, local adaptation rationale and pathway evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.
---------------------------	---

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C09-M02 - Curriculum Mapping and Pathways

Downloadable resource	Curriculum Mapping and Pathways - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Curriculum Mapping and Pathways within Curriculum Design, Local Adaptation and Learning Pathways. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Curriculum Mapping and Pathways, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	curriculum map, local adaptation rationale and pathway evidence
Model completed example	A participant notices that curriculum mapping and pathways is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Curriculum Mapping and Pathways resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Curriculum Mapping and Pathways - Professional Downloadable Toolkit, includes evidence connected to curriculum map, local adaptation rationale and pathway evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C09-M03 - Learning Outcomes and Progression

Downloadable resource	Learning Outcomes and Progression - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Learning Outcomes and Progression within Curriculum Design, Local Adaptation and Learning Pathways. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local

	adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Learning Outcomes and Progression, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	curriculum map, local adaptation rationale and pathway evidence
Model completed example	A participant notices that learning outcomes and progression is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Learning Outcomes and Progression resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Learning Outcomes and Progression - Professional Downloadable Toolkit, includes evidence connected to curriculum map, local adaptation rationale and pathway evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C09-M04 - Local Adaptation Planning

Downloadable resource	Local Adaptation Planning - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Local Adaptation Planning within Curriculum Design, Local Adaptation and Learning Pathways. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Local Adaptation Planning, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	curriculum map, local adaptation rationale and pathway evidence
Model completed example	A participant notices that local adaptation planning is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Local Adaptation Planning resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Local Adaptation Planning - Professional Downloadable Toolkit, includes evidence connected to curriculum map, local adaptation rationale and pathway evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C09-M05 - Curriculum Evidence Review

Downloadable resource	Curriculum Evidence Review - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Curriculum Evidence Review within Curriculum Design, Local Adaptation and Learning Pathways. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Curriculum Evidence Review, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	curriculum map, local adaptation rationale and pathway evidence
Model completed example	A participant notices that curriculum evidence review is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Curriculum Evidence Review resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Curriculum Evidence Review - Professional Downloadable Toolkit, includes evidence connected to curriculum map, local adaptation rationale and pathway evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C09-M06 - Curriculum Improvement Portfolio

Downloadable resource	Curriculum Improvement Portfolio - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Curriculum Improvement Portfolio within Curriculum Design, Local Adaptation and Learning Pathways. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Curriculum Improvement Portfolio, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	curriculum map, local adaptation rationale and pathway evidence
Model completed example	A participant notices that curriculum improvement portfolio is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Curriculum Improvement Portfolio resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Curriculum Improvement Portfolio - Professional Downloadable Toolkit, includes evidence connected to curriculum map, local adaptation rationale and pathway evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

Research-informed source basis

- OKM - Ministry of Education and Culture: <https://okm.fi/en/duties-and-objectives> - Education development as policy, public responsibility, system direction and institutional development context.
- EDUFI - National Core Curriculum: <https://www.oph.fi/en/education-and-qualifications/national-core-curriculum-primary-and-lower-secondary-basic-education> - National core curriculum as common foundation for local curricula, equality, local adaptation and teaching support.
- EDUFI - Basic Education: <https://www.oph.fi/en/education-system/basic-education> - Curriculum supporting reform of school culture and pedagogy to improve learning process and outcomes.
- FINEEC - Enhancement-led evaluation: <https://www.karvi.fi/en/about-us/about-our-evaluations/enhancement-led-evaluation> - Development, participation, learning, positive approach, appreciation, trust and impact.
- FINEEC - Support for quality management: <https://www.karvi.fi/en/about-us/support-quality-management> - Participation, trust and providers responsibility for maintaining and improving quality.
