

C11 Downloadable Professional Resource Pack

Digital Learning, AI and Blended Finnish-Inspired Pedagogy

Finnish-inspired - EDUFI-aligned - FINEEC-benchmarked

Digital professional learning platform

Email: hello@fcei.eu | Website: www.fcei.eu

Course resource purpose

This course-level downloadable pack upgrades the FCEI resources for Digital Learning, AI and Blended Finnish-Inspired Pedagogy. It is designed for learner use, facilitator guidance, institutional implementation and developer integration on www.fcei.eu.

Framework focus: digital learning. Core terminology: AI ethics, blended pedagogy, digital evidence and learner support.

Professional framing used in every resource

OKM / Ministry of Education and Culture: system development, public responsibility, education quality, institutional direction and policy-aware improvement.

EDUFI: curriculum as a common foundation for equality, local adaptation, school culture, pedagogy, teaching support and learner experience.

FINEEC: enhancement-led evaluation, participation, trust, learning, appreciation, strengths, development targets and impact.

Module downloadables

C11-M01 - Digital Pedagogy and Learning Design

Downloadable resource	Digital Pedagogy and Learning Design - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Digital Pedagogy and Learning Design within Digital Learning, AI and Blended Finnish-Inspired Pedagogy. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Digital Pedagogy and Learning Design, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	digital lesson flow, AI use rationale and learner support evidence
Model completed example	A participant notices that digital pedagogy and learning design is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Digital Pedagogy and Learning Design resource? What evidence supports your judgement? What should be continued,

	adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Digital Pedagogy and Learning Design - Professional Downloadable Toolkit, includes evidence connected to digital lesson flow, AI use rationale and learner support evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C11-M02 - AI Use and Ethical Learning Support

Downloadable resource	AI Use and Ethical Learning Support - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports AI Use and Ethical Learning Support within Digital Learning, AI and Blended Finnish-Inspired Pedagogy. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to AI Use and Ethical Learning Support, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	digital lesson flow, AI use rationale and learner support evidence
Model completed example	A participant notices that ai use and ethical learning support is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this AI Use and Ethical Learning Support resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled AI Use and Ethical Learning Support - Professional Downloadable Toolkit, includes evidence connected to digital lesson flow, AI use rationale and learner support evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C11-M03 - Blended Learning Flow

Downloadable resource	Blended Learning Flow - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Blended Learning Flow within Digital Learning, AI and Blended Finnish-Inspired Pedagogy. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local

	adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Blended Learning Flow, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	digital lesson flow, AI use rationale and learner support evidence
Model completed example	A participant notices that blended learning flow is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Blended Learning Flow resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Blended Learning Flow - Professional Downloadable Toolkit, includes evidence connected to digital lesson flow, AI use rationale and learner support evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C11-M04 - Digital Evidence and Feedback

Downloadable resource	Digital Evidence and Feedback - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Digital Evidence and Feedback within Digital Learning, AI and Blended Finnish-Inspired Pedagogy. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Digital Evidence and Feedback, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	digital lesson flow, AI use rationale and learner support evidence
Model completed example	A participant notices that digital evidence and feedback is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Digital Evidence and Feedback resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Digital Evidence and Feedback - Professional Downloadable Toolkit, includes evidence connected to digital lesson flow, AI use rationale and learner support evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C11-M05 - Platform Safety and Learner Support

Downloadable resource	Platform Safety and Learner Support - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Platform Safety and Learner Support within Digital Learning, AI and Blended Finnish-Inspired Pedagogy. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Platform Safety and Learner Support, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	digital lesson flow, AI use rationale and learner support evidence
Model completed example	A participant notices that platform safety and learner support is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Platform Safety and Learner Support resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Platform Safety and Learner Support - Professional Downloadable Toolkit, includes evidence connected to digital lesson flow, AI use rationale and learner support evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C11-M06 - Digital Learning Implementation Portfolio

Downloadable resource	Digital Learning Implementation Portfolio - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Digital Learning Implementation Portfolio within Digital Learning, AI and Blended Finnish-Inspired Pedagogy. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Digital Learning Implementation Portfolio, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	digital lesson flow, AI use rationale and learner support evidence
Model completed example	A participant notices that digital learning implementation portfolio is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Digital Learning Implementation Portfolio resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Digital Learning Implementation Portfolio - Professional Downloadable Toolkit, includes evidence connected to digital lesson flow, AI use rationale and learner support evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

Research-informed source basis

- OKM - Ministry of Education and Culture: <https://okm.fi/en/duties-and-objectives> - Education development as policy, public responsibility, system direction and institutional development context.
- EDUFI - National Core Curriculum: <https://www.oph.fi/en/education-and-qualifications/national-core-curriculum-primary-and-lower-secondary-basic-education> - National core curriculum as common foundation for local curricula, equality, local adaptation and teaching support.
- EDUFI - Basic Education: <https://www.oph.fi/en/education-system/basic-education> - Curriculum supporting reform of school culture and pedagogy to improve learning process and outcomes.
- FINEEC - Enhancement-led evaluation: <https://www.karvi.fi/en/about-us/about-our-evaluations/enhancement-led-evaluation> - Development, participation, learning, positive approach, appreciation, trust and impact.
- FINEEC - Support for quality management: <https://www.karvi.fi/en/about-us/support-quality-management> - Participation, trust and providers responsibility for maintaining and improving quality.
