

C13 Downloadable Professional Resource Pack

TVET Competence-Based Learning and Workplace Evidence

Finnish-inspired - EDUFI-aligned - FINEEC-benchmarked

Digital professional learning platform

Email: hello@fcei.eu | Website: www.fcei.eu

Course resource purpose

This course-level downloadable pack upgrades the FCEI resources for TVET Competence-Based Learning and Workplace Evidence. It is designed for learner use, facilitator guidance, institutional implementation and developer integration on www.fcei.eu.

Framework focus: TVET competence. Core terminology: observable work tasks, workplace scenarios and practical demonstration evidence.

Professional framing used in every resource

OKM / Ministry of Education and Culture: system development, public responsibility, education quality, institutional direction and policy-aware improvement.

EDUFI: curriculum as a common foundation for equality, local adaptation, school culture, pedagogy, teaching support and learner experience.

FINEEC: enhancement-led evaluation, participation, trust, learning, appreciation, strengths, development targets and impact.

Module downloadables

C13-M01 - Competence-Based TVET Design

Downloadable resource	Competence-Based TVET Design - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Competence-Based TVET Design within TVET Competence-Based Learning and Workplace Evidence. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Competence-Based TVET Design, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	observable work task, workplace scenario and practical demonstration evidence
Model completed example	A participant notices that competence-based tvet design is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Competence-Based TVET Design resource? What evidence supports your judgement? What should be continued,

Certificate evidence rule	adapted, scaled or redesigned? The downloadable evidence is complete when the participant submits a filled Competence-Based TVET Design - Professional Downloadable Toolkit, includes evidence connected to observable work task, workplace scenario and practical demonstration evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.
---------------------------	--

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C13-M02 - Workplace Task Mapping

Downloadable resource	Workplace Task Mapping - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Workplace Task Mapping within TVET Competence-Based Learning and Workplace Evidence. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Workplace Task Mapping, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	observable work task, workplace scenario and practical demonstration evidence
Model completed example	A participant notices that workplace task mapping is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Workplace Task Mapping resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Workplace Task Mapping - Professional Downloadable Toolkit, includes evidence connected to observable work task, workplace scenario and practical demonstration evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C13-M03 - Industry Scenario Development

Downloadable resource	Industry Scenario Development - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Industry Scenario Development within TVET Competence-Based Learning and Workplace Evidence. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local

	adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Industry Scenario Development, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	observable work task, workplace scenario and practical demonstration evidence
Model completed example	A participant notices that industry scenario development is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Industry Scenario Development resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Industry Scenario Development - Professional Downloadable Toolkit, includes evidence connected to observable work task, workplace scenario and practical demonstration evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C13-M04 - Practical Demonstration Assessment

Downloadable resource	Practical Demonstration Assessment - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Practical Demonstration Assessment within TVET Competence-Based Learning and Workplace Evidence. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Practical Demonstration Assessment, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	observable work task, workplace scenario and practical demonstration evidence
Model completed example	A participant notices that practical demonstration assessment is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Practical Demonstration Assessment resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Practical Demonstration Assessment - Professional Downloadable Toolkit, includes evidence connected to observable work task, workplace scenario and practical demonstration evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C13-M05 - Workplace Evidence Portfolio

Downloadable resource	Workplace Evidence Portfolio - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Workplace Evidence Portfolio within TVET Competence-Based Learning and Workplace Evidence. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Workplace Evidence Portfolio, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	observable work task, workplace scenario and practical demonstration evidence
Model completed example	A participant notices that workplace evidence portfolio is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Workplace Evidence Portfolio resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Workplace Evidence Portfolio - Professional Downloadable Toolkit, includes evidence connected to observable work task, workplace scenario and practical demonstration evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C13-M06 - TVET Quality Review and Improvement

Downloadable resource	TVET Quality Review and Improvement - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports TVET Quality Review and Improvement within TVET Competence-Based Learning and Workplace Evidence. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to TVET Quality Review and Improvement, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	observable work task, workplace scenario and practical demonstration evidence
Model completed example	A participant notices that tvet quality review and improvement is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this TVET Quality Review and Improvement resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled TVET Quality Review and Improvement - Professional Downloadable Toolkit, includes evidence connected to observable work task, workplace scenario and practical demonstration evidence, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

Research-informed source basis

- OKM - Ministry of Education and Culture: <https://okm.fi/en/duties-and-objectives> - Education development as policy, public responsibility, system direction and institutional development context.
- EDUFI - National Core Curriculum: <https://www.oph.fi/en/education-and-qualifications/national-core-curriculum-primary-and-lower-secondary-basic-education> - National core curriculum as common foundation for local curricula, equality, local adaptation and teaching support.
- EDUFI - Basic Education: <https://www.oph.fi/en/education-system/basic-education> - Curriculum supporting reform of school culture and pedagogy to improve learning process and outcomes.
- FINEEC - Enhancement-led evaluation: <https://www.karvi.fi/en/about-us/about-our-evaluations/enhancement-led-evaluation> - Development, participation, learning, positive approach, appreciation, trust and impact.
