

C14 Downloadable Professional Resource Pack

FCEI Consultancy, Workshops and Institutional Implementation

Finnish-inspired - EDUFI-aligned - FINEEC-benchmarked

Digital professional learning platform

Email: hello@fcei.eu | Website: www.fcei.eu

Course resource purpose

This course-level downloadable pack upgrades the FCEI resources for FCEI Consultancy, Workshops and Institutional Implementation. It is designed for learner use, facilitator guidance, institutional implementation and developer integration on www.fcei.eu.

Framework focus: consultancy implementation. Core terminology: needs analysis, stakeholder voice, implementation planning and impact evidence.

Professional framing used in every resource

OKM / Ministry of Education and Culture: system development, public responsibility, education quality, institutional direction and policy-aware improvement.

EDUFI: curriculum as a common foundation for equality, local adaptation, school culture, pedagogy, teaching support and learner experience.

FINEEC: enhancement-led evaluation, participation, trust, learning, appreciation, strengths, development targets and impact.

Module downloadables

C14-M01 - Consultancy Needs Analysis

Downloadable resource	Consultancy Needs Analysis - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Consultancy Needs Analysis within FCEI Consultancy, Workshops and Institutional Implementation. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Consultancy Needs Analysis, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	needs analysis, stakeholder voice record, implementation timeline and impact reflection
Model completed example	A participant notices that consultancy needs analysis is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.

Reflection prompt	What changed in practice after using this Consultancy Needs Analysis resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Consultancy Needs Analysis - Professional Downloadable Toolkit, includes evidence connected to needs analysis, stakeholder voice record, implementation timeline and impact reflection, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C14-M02 - Stakeholder Voice and Institutional Context

Downloadable resource	Stakeholder Voice and Institutional Context - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Stakeholder Voice and Institutional Context within FCEI Consultancy, Workshops and Institutional Implementation. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Stakeholder Voice and Institutional Context, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	needs analysis, stakeholder voice record, implementation timeline and impact reflection
Model completed example	A participant notices that stakeholder voice and institutional context is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Stakeholder Voice and Institutional Context resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Stakeholder Voice and Institutional Context - Professional Downloadable Toolkit, includes evidence connected to needs analysis, stakeholder voice record, implementation timeline and impact reflection, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C14-M03 - Workshop and Implementation Planning

Downloadable resource	Workshop and Implementation Planning - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Workshop and Implementation Planning within FCEI Consultancy, Workshops and Institutional Implementation. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
OKM framing	The resource connects classroom, leadership and institutional development to the wider Ministry of Education and Culture policy context: education improvement

	should be planned as part of system development, quality, inclusion, research-informed practice and public responsibility.
EDUFI-aligned framing	The resource uses EDUFI-aligned wording by treating curriculum and learning design as a common foundation that supports equality while allowing local adaptation. Participants connect national-level principles to local curriculum, school culture, pedagogy and learner experience.
FINEEC-benchmarked framing	The resource uses FINEEC-benchmarked wording by applying enhancement-led development: participation, trust, learning, appreciation, strengths, development targets and impact. Evidence is used to improve practice, not to blame individuals.
Meaning in practice	In practice, participants use the toolkit to identify one priority related to Workshop and Implementation Planning, choose a manageable action, complete the professional template, collect evidence and decide what should improve next.
Evidence requirement	needs analysis, stakeholder voice record, implementation timeline and impact reflection
Model completed example	A participant notices that workshop and implementation planning is discussed in general terms but is not yet visible in daily practice. They complete the toolkit by selecting one priority, designing a focused action, collecting one piece of evidence, and writing a next-step improvement decision.
Reflection prompt	What changed in practice after using this Workshop and Implementation Planning resource? What evidence supports your judgement? What should be continued, adapted, scaled or redesigned?
Certificate evidence rule	The downloadable evidence is complete when the participant submits a filled Workshop and Implementation Planning - Professional Downloadable Toolkit, includes evidence connected to needs analysis, stakeholder voice record, implementation timeline and impact reflection, and writes one improvement decision aligned to the FCEI Finnish Teacher Training Development Framework.

Editable template fields:

- Context and role
- Priority or problem statement
- EDUFI-aligned principle in action
- FINEEC-benchmarked evidence focus
- Action steps
- Evidence source
- Stakeholder or learner voice
- Reflection and next improvement decision

C14-M04 - Evidence Collection for Consultancy

Downloadable resource	Evidence Collection for Consultancy - Professional Downloadable Toolkit
Short explanation	This downloadable toolkit supports Evidence Collection for Consultancy within FCEI Consultancy, Workshops and Institutional Implementation. It helps participants translate Finnish education principles into a reusable professional artefact, not simply complete a reading activity.
