

FCEI Transferability Filter

A 7-step framework that helps educators adapt Finnish-Pedagogy practice to local contexts responsibly, without copying another system uncritically.

Downloadable professional learning asset | Finnish-Pedagogy | EDUFI-aligned | FINEEC-benchmarked

Resource type	7-step framework
Author	Finland Creative Education Institute (FCEI)
Recommended users	teachers, school leaders, facilitators, TVET providers and education teams
Internal course links	C01 Foundations of Finnish-Pedagogy Education; C07 Curriculum Design and Finnish-Pedagogy Adaptation; C14 Consultancy and Institutional Implementation

Purpose

Use the Transferability Filter before importing or adapting any practice. The filter helps teams move from admiration to responsible implementation by checking principle, context, equity, capacity, evidence and sustainability.

EDUFI-aligned use

The filter supports local curriculum adaptation by asking how a shared educational principle can be translated into local practice, needs and learner contexts.

FINEEC-benchmarked use

The filter supports enhancement-led development by requiring stakeholder participation, evidence, reflection and a clear improvement decision.

Key definitions

Transferability means adapting the principle behind a practice, not copying the surface activity. Local context means curriculum, culture, timetable, resources, learner needs and staff capacity. Evidence means the proof used to decide whether the adaptation is working.

How to use

Apply all seven steps before launching a new practice. Do not skip the evidence and capacity steps. End with an adapt, trial, pause or reject decision.

Working tool

Step	Question	Team notes	Decision
1. Principle	What Finnish-Pedagogy principle is being adapted?		
2. Context	What local curriculum, culture, timetable or resource factor affects this practice?		
3. Learner access	Who benefits and who may be excluded?		
4. Teacher capacity	What training, time or support do teachers need?		
5. Evidence	What evidence will show whether it works?		
6. Small trial	Where can it be tested safely first?		
7. Decision	Should we adapt, scale, pause or redesign?		

Model completed example

A school wants to introduce project-based learning. The filter shows that teachers need planning time, learners need vocabulary scaffolds and the assessment rubric must match local curriculum outcomes. The school trials one four-lesson project in Grade 7 before expanding.

Finland Creative Education Institute (FCEI)

Reflection and improvement prompts

- What principle are we adapting?
- What local condition must be respected?
- What evidence will tell us whether the adaptation is worth continuing?

Author bio

Finland Creative Education Institute (FCEI) is a digital professional learning platform that supports educators, school leaders, TVET providers, institutions and learning communities through Finnish-Pedagogy training, EDUFI-aligned curriculum language, FINEEC-benchmarked quality improvement practice and practical evidence-based implementation tools.
